I was wondering if Unity encourages the use of anonymous type / linq to sql instead of entity framework? Reason being that it seems that you can do an awful lot of things with them that you would have to write with Linq to Sql. I would like to know if this is simply because they have been around for a long time and have been used a lot by people who know Entity framework well or if it is something that Unity really encourages. I am having a hard time finding any information on the web but Unity forums seem to have very few questions from people who do not know Entity Framework. A: I have not used Unity myself, but I would think that it would still be an Entity Framework compatible container. If you look at the Fluent API that the Entity Framework team has created, it is still in effect of the Entity Framework codebase. If you look at the first part of this blog post which starts off the discussion on: "Why use Entity Framework with LINQ and Code First?" you can see that it is indeed
