After this, you must open the crack file and follow the instructions on how to patch the software. Once the patching process is complete, the software is cracked and ready to use.

The Storekeeper then is just a person that give it to his Boss and gets a salary for it. The Boss then is the one that in turn represents the Director, and the Director is in charge of giving orders to each of the individual departments. If the Director doesn,t do anything, the Department Heads don,t know and don,t care either. **Idea for a Strategy: The Storekeeper**
Three levels are established to make things run smoothly. This system makes sure that the Store stays in good condition and that everything is running as it should. The Storekeeper is the one that has the important job of making sure this happens. He must be able to create good calls for an effective chain of orders. He must also be able to handle and balance the resulting flow of goods. He, therefore, is involved in all aspects of the business of the Store. The Storekeeper also has to handle quite a lot of paperwork to make sure that everything is running as it should. This includes paperwork that comes from the country that has such business and paperwork that is specific for the type of goods that he has to handle. Over this, he, therefore, is very busy and must deal with many different logistical challenges. **Idea for a Strategy: The Director**

The Director is in charge of giving orders to the different departments of the Store. He knows what goods are needed to achieve the Storekeepers goals, and he can influence the creation of these goods. If he is not happy with the way a department is handled or with the way that discipline is handled, he can change the department. If it,s not working, he can simply replace the person that is in charge of this department with someone that may be better at it.
